# Total Tanker Air Force No Pumps !

Transporting asphalt emulsion is now a breeze with the **Total Tanker** Air Force. The **Total Tanker** uses compressed air to force the liquid asphalt emulsion out of the tank. **No Pumps** to clean or maintenance. Just hook up to your patchers compressed air system and start filling.

With **The Total Tankers** onboard clean out system you can easily flush the emulsion valve and hose in a few seconds using only a couple quarts of diesel.

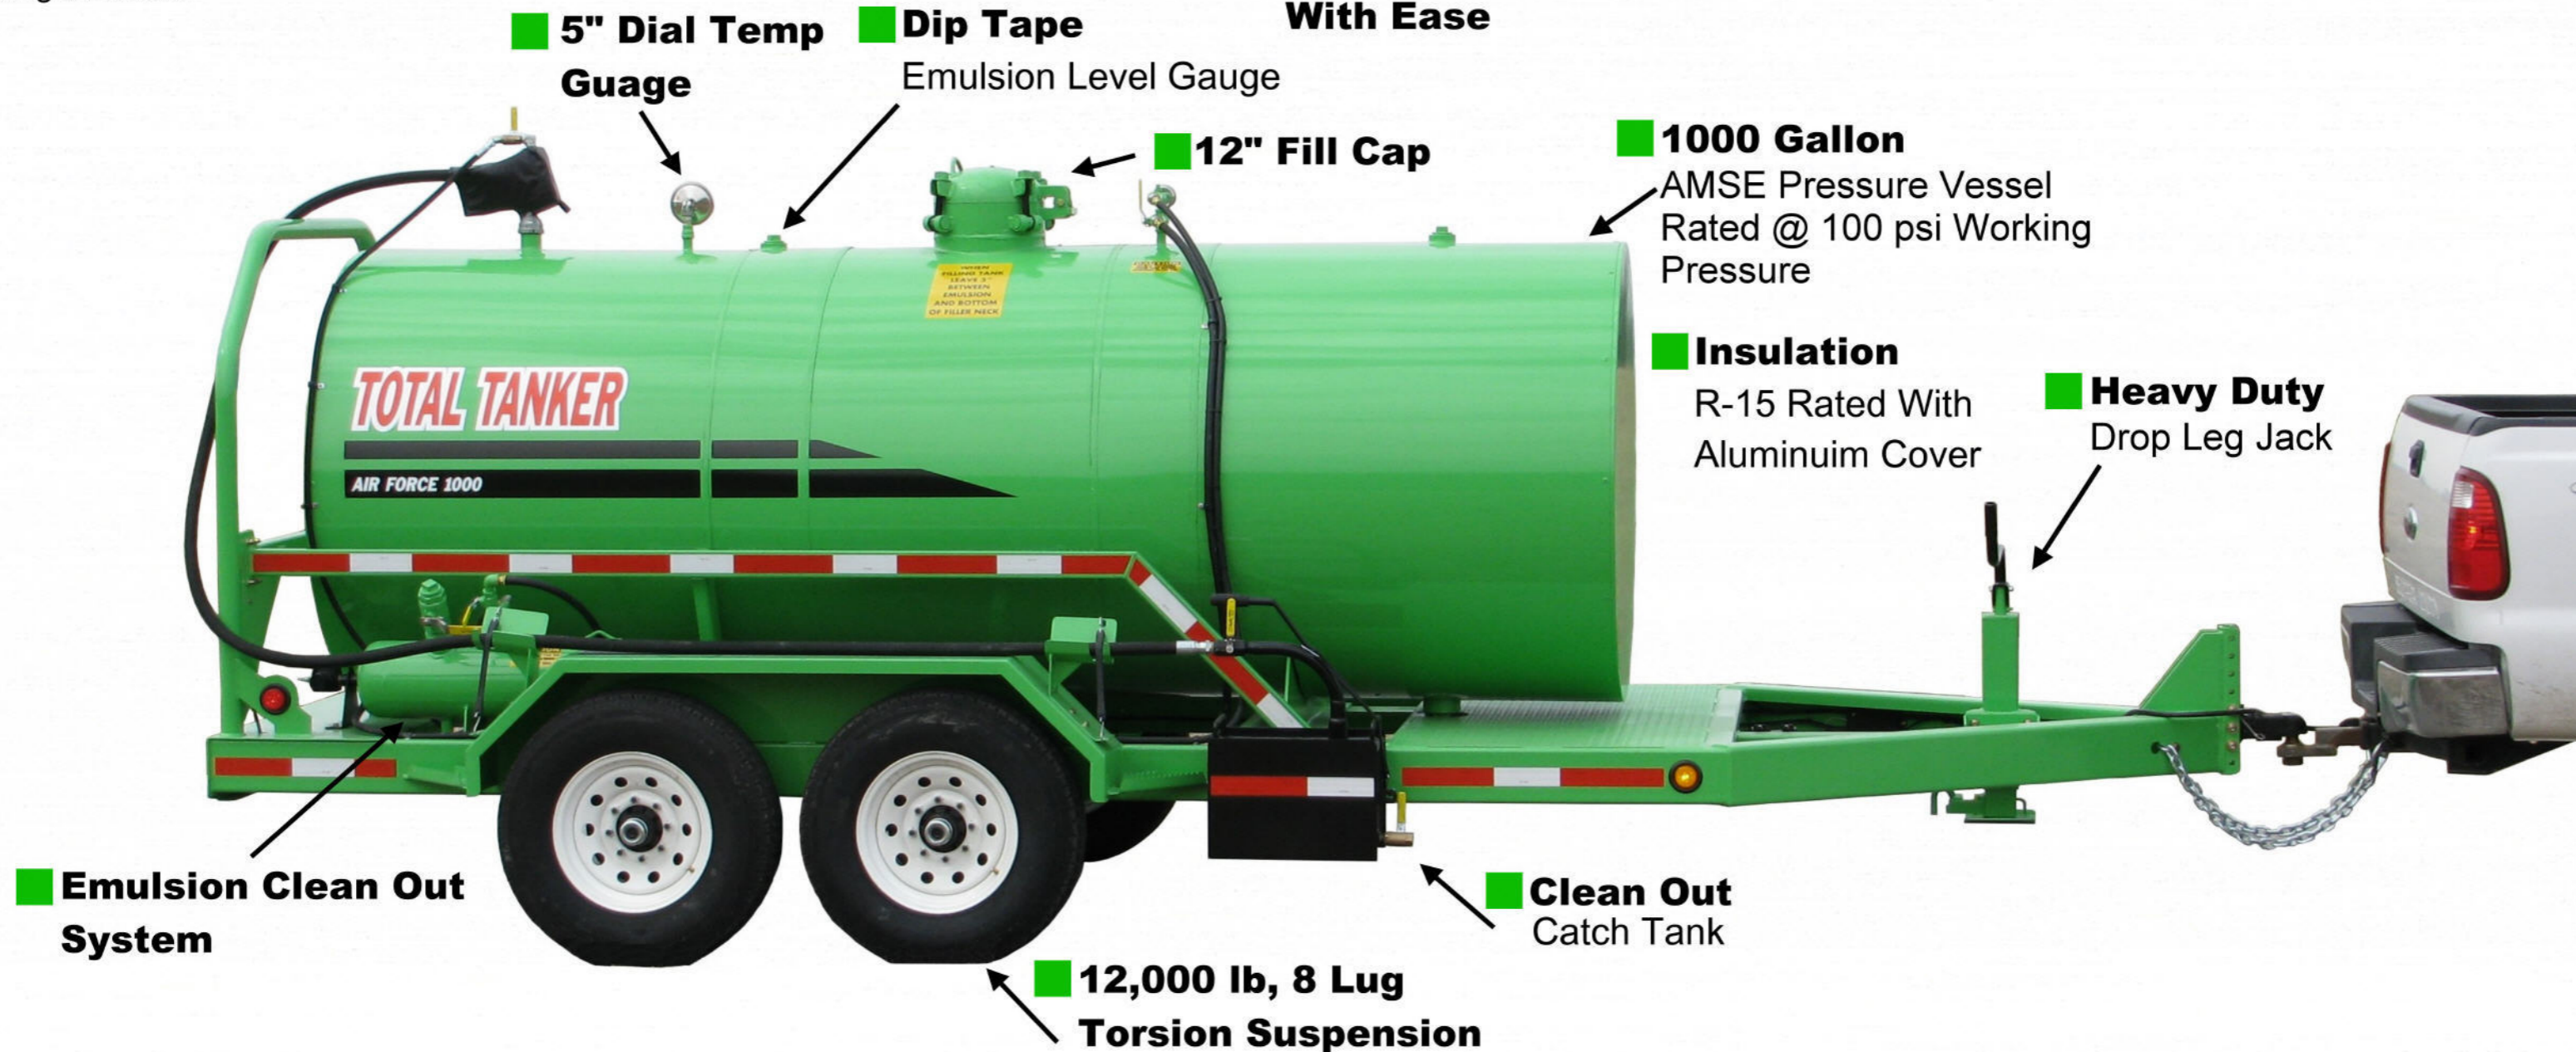

The **Total Tanker** Is a 1000 gallon AMSE certified Pressure vessel. That is heated with two 1000 watt 220/208 volt thermostatic controlled heating blankets.
